

Table 1 GLM\_1 results explaining presence/absence of regrowth from the inoculum 8 d after moved to new soil tray.

Variable	Estimate	Odds ratio
Inoculum volume	0.56*	1.75
Bait volume	-0.08*	0.92
Inoculum:Bait volume	-0.04*	0.96
Distance	-	-

Distance between inoculum and bait was not selected in the best model according to lowest AIC.

\*,  $P < 0.05$ .
